WALL STREET SHOWING SOME SIGNS OF LIFE

Lethargy of Past Two Days Passing Off and Hope of Recovery Is Expressed.

NEW YORK, March 1-The movement of today's stock market was + somewhat more consistent than that of | + yesterday, in that prices were above

day, in the character of the tessentially changed. Trading for the minimum record for the last four years, and the movement of prices was so narrow and sluggish as to be imperceptible. There were minutes at a time when the ticker was silent and motionless.

The fact that prices moved upwards news to account for it. The news to account for it. The facts that these failed to deres cline, covered their shorts and lifted prices. The uncertainty over the out-Rubber Goods do preferred come of the Paris settlement seems to have been a large influence in a nega-tive way in our market. The progress of the settlement today and reports that arrangements had been made to patch up threatened difficulties in connection with it, relieved the stock market from Some of its depression and conduced to the rally.

R

Sugar was the strongest stock, the only news on it being the deciaration of the regular dividend, about which there had been no doubt felt, and a rise in the price of refined sugar. Other-wise it was quite impossible to account for the movement of the market from any news known. The returns of earn-ings for January which appeared during the day included Canadian Pacific and Southern Pacific, all showing de-clines in net earnings of varying degrees compared with last year's corre-sponding period. Rock Island and Canadian Pacific showed some heavi-ness early in the day, but stocks of the other companies advanced with the rest of the market. Prices dropped from the best before the closing, after a period of practical stagnation.

Bonds were Irregular. Total sales par value, \$905,000. United States bonds were unchanged on call.

Grain and Provisions.

CHICAGO, March 1.-Throughout the Session the sentiment in the wheat pit was extremely bearish and there was constant general liquidation. Lower prices in all foreign grain markets caused a weak opening. May began 1/461c lower at 11.00/1.00% and July down 1/475c to 11/40 lower at 937/334c.

Unmistakable evidence was given at the start that general centiment had for the time being completely changed from the recent remarkable bullishness. Long wheat bought under the belief that the war would be sure to spread was for sale in large quantities. There was also an enlarged movement of wheat toward Western accumulating centers that did much to throw doubt on the reported smallness of the farmers' reserves. On this view of the situation all of the large

NO ACCIDENTS IN NATURE.

Every Calamity, No Matter How Great, Has a Definite Beginning.

OMAHA, Neb., March 1.—Twenty States were represented by 250 delegates to the National Co-operative Grain-Growers and Stock-Raisers' association when that body convened here today.

H. N. Gaines of Topeka was made chairman and Robert Lindbloom of Chicago, secretary.

The executive committee presented the proposed new constitution. It provides that the name of the association shall be changed to the Farmers' National Exchange company.

Its object shall be to "buy, sell and deal in grain, live stock and all kinds of produce on commission and otherwise, and for that purpose build and equip clevators, warehouses, cold storage plants, stockyards, and whatever shall be necessions.

Great, Has a Definite Beginning.

There are no accidents in nature. The availanche that without a moment's warning rushes headions down the mountain side is not an accident.

For years previous tiny atoms have been crystalizing and adding their minute weight to the mass which left its base when the accumulation reached a certain point.

Neither is baldness an accident. The infinitesimally small germ which is the cause of Dandruff and Baldness, feeds silently and long before the result is seen. The small germs which thrive on the scale and which are the cause of Baldness and Dandruff cannot exist, however, when Newbro's Herpicide is applied.

commission houses had wheat for sale and the Northwest was also a liberal seller here.

Very little support was offered until May had declined to 90c and July to 925c. A scattered demand from shorts and buying of July by the instigators of the discarded May deal caused some recovery. May rallying to 935c and July to 935c. A decrease of nearly 3,060,000 bushels in the world's visible stocks had a steadying influence for a time. During the last half hour of trading, however, heavy selling again set in and the market became violent. May dropped to 965c, a decilne of 4c from the high point for the day. July fell 2c to 915c. A slight recovery followed on buying by shorts, but the close was weak, with May at 975c. July closed at 915c.

Corn declined with wheat, the market being without support. May closed with a loss of 2c and July was 1362c lower at 535c.

There was a severe break in oats. May

a loss of 2c and July was 1%@2c lower at 55%c.

There was a severe break in cats. May closed 2%@2%c lower at 42c and July 2%c lower at 38%c.

Liquidation in hog products was on a scale similar to that in the grain markets. Prices in all lists showed sharp losses. May pork, however, was especially weak and declined 87%c for the day. The weakness in grains and the lower prices for hogs at the yards were the bear factors. The close was practically at the bottom. May pork was 87%c lower, lard and ribs each 42%c lower.
